OBJECT: Compliance with Regulation (EC) n. 1907/2006

This declaration aims to inform you concerning the compliance with the provisions laid down by Regulation (EC) No 1907/2006 concerning Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH).

As you may be aware, according to REACH Regulation, any manufacturer or importer of a substance either on its own or as component of one or more mixtures in quantities equal to or greater than one tonne per year, shall submit a registration to the Agency (ECHA - European Chemicals Agency).

This provision also applies to substances contained in articles when these substances are present in quantities totalling over one tonne per producer or importer per year and the substances are intended to be released under normal or reasonably foreseeable conditions of use.

31st of May, 2018 represented the last deadline for the registration of phase-in substances. A company that does not comply with this duty shall not manufacture or import a substance in Europe in quantity equal to or greater than 1 ton/year.

In order to maintain our commercial partnership, it is our interest to state the following:

API SpA verified that all substances purchased by API SpA on their own or in mixtures and used in the production of the products we supply you have been registered or exempted by the manufacturers/importers.

Kind regards,

A.P.I. S.p.A.
