SANTOPRENE 101-55 LD3002 BLK (NP)

Nanomaterials

Our SANTOPRENE® products are in granulate form and thus not considered as nanomaterials as defined by the European Commission under Recommendation 2022/C 229/01. No material of nanoscale is added to our products for its specific nanoscale properties during the manufacturing process. Some SANTOPRENE® products contain raw materials, e.g. pigments and fillers, which might fall under the definition proposed by the European Commission. However, they are dispersed and embedded in the polymer matrix and thus not available anymore in nanoform.

This statement is valid until a regulation change and for a period of one year, after which it will automatically expire and can be renewed upon request.

Celanese, Engineered Materials Product Safety.

Disclaimer/Important: This information is provided to the best of our knowledge and based on the information given by our raw material suppliers at the date hereof. It is believed accurate as the date of the document. This information relates only to the above-mentioned materials as delivered in their original packaging. It does not relate to any product made of these materials with or without the inclusion of further additives, such as processing aids or colorants. Celanese does not make any representations or warranties written, implied, or otherwise concerning the use of its products in customer applications. This information is not intended to substitute for any testing you may need to determine the suitability of this product for a particular purpose. This information should not be construed as a promise or guarantee of specific properties of the products described or their suitability for a particular application. Please note that the manufacturer or seller of parts and articles made of our Celanese Engineered Materials products has to take the full responsibility regarding applicable legal requirements. Any existing intellectual property rights must be observed. The information provided here does not cover the suitability of our Celanese Engineered Materials products for Food Contact applications, medical device applications, pharmaceutical applications, cosmetic applications, drinking water applications.
