EU REACH Update

Dear Sir or Madam,

All chemical substances, contained in Lubrizol products, comply with the registration obligations of EU REACH when these products are supplied to your company from Lubrizol plants based in the EU or when your company purchases these products from Lubrizol legal entities established in the EU.

If your company receives a Lubrizol product directly from a Lubrizol plant based outside the EU, and you have entered into an EU Only Representative (OR) agreement with Lubrizol, subject to the terms and conditions therein, all relevant substances are also in compliance with the EU REACH requirements.

If your company plans to export a Lubrizol product to the EU, either as such or as part of your own product, please contact onlyrepresentative@lubrizol.com to discuss the practicalities of Lubrizol providing EU REACH coverage.

If there are changes in our supply plans as a result of EU REACH that impact you, we will inform you at the earliest possible opportunity and work with you to minimize the impact of our decision.

Do not hesitate to contact us if you have any further questions.

Yours faithfully,

John Smoggie
Director, Regulatory Services
The Lubrizol Corporation
