

Capilene[®] CT 80 A

Polypropylene

Food Contact Declaration – Japan

The base resin used to produce the above mentioned Capilene[®] grade is listed on Japan positive list, Table 1(1) for base polymers, published by Japan Ministry of Health, Labour and Welfare (MHLW) for materials that come into contact with food issued on April 28th, 2020 last updated on June 23rd, 2020.

The base resin doesn't have any food category restriction in the Positive List and is approved for use in the following food categories: acidic, fatty/oily, milk/milk product, alcoholic beverage and others, with maximum temperature category III- over 100°C.

The intentionally used additives in the above mentioned Capilene[®] grade comply with the relevant requirement of Japan positive list, Table 2 for additives, published by Japan Ministry of Health, Labour and Welfare (MHLW) for materials that come into contact with food issued on April 28th, 2020 last updated on July 20th, 2020.

One or more additives used in the manufacturing process has/have restrictions in:
Coating applications

The positive lists of monomers and additives are available on the MHLW website, in the following link:

https://www.mhlw.go.jp/stf/seisakunitsuite/bunya/kenkou_iryuu/shokuhin/kigu/index_00003.html

We do not perform migration tests on our products.

It is the responsibility of the manufacturer of the finished plastic food contact article to check and confirm that the final article meets both the technical and regulatory requirements of the application.
