

PLASTRIBUTION LTD

Att. Damian.Bennett@plastribution.co.uk

**PRODUCTS: Granic 1051**

GCR informs you, according to information provided by our main polymer suppliers, that the components of the above-mentioned products comply with the corresponding requirements of below Chinese Food Safety Standards:

- **GB 9685-2016 – Additives for Food Contact Materials and Articles. Article No. 3 of the Framework Regulation.**
- **GB 4806.1-2016 – General Safety Requirements for Food Contact Materials and Articles.**
- **GB4806.6-2016 – Food Contact Use Plastic Resins with listing No.23, Note 2.**

Furthermore, the polymeric part of the above-mentioned products have substances with specific migration limits (SML) of certain substances according to one and/or more of the above-mentioned information.

Moreover, GCR informs you that end-use article manufacturers using the above products for the fabrication of finished products (materials/articles) intended to come into contact with food are responsible for and must comply with all relevant food contact restrictions/limitations as set forth in China's National Standards GB 4806.6-2016, GB 4806.7-2016 and GB 9685-2016 and all applicable regulations. Further, as stated in GB 4806.1-2016, it is the responsibility of the end-use article manufacturer to ensure that the article is appropriate for its intended food-contact use, and that its use does not cause adulteration of food.

This document expires one year after the date of issue or if an update occurs sooner.
