

PLASTRIBUTION LTD
Att. Damian.Bennett@plastribution.co.uk

PRODUCT: Granic 535

GCR informs you, according to information provided by our main suppliers, that the component of above-mentioned product complies with the corresponding requirements of below Chinese Food Safety Standards:

- **GB 9685-2016 – Additives for Food Contact Materials and Articles**
- **GB 4806.1-2016 – General Safety Requirements for Food Contact Materials and Articles.**
- **GB4806.7-2023 – National Food Safety Standard on Plastic Materials and Articles for Food Contact**

Specifically:

- All components of the above-mentioned products are listed in GB 9685-2016 and/or GB 4806.7-2023.

According to GB 9685-2016 (art 2.) certain components of the polymer part of the above-mentioned product may be subject to specific migration limits (SML) and/or other restrictions as follows:

- Octadecyl 3-(3,5-di-tert-butyl-4-hydroxyphenyl) propionate (CAS: 2082-79-3)
- Zinc Oxide (CAS: 1314-13-2)

It is the responsibility of the manufacturer of food contact materials and articles, made wholly or partially from this product, to conduct the appropriate tests to assess compliance with the overall migration limit (OML) and specific migration limit (SML) in the final products. These tests are essential to ensure conformity with the applicable regulations based on different food types and intended use conditions.

This document expires one year after the date of issue or if an update occurs sooner.
