non-halogen TARFLON 2019

Düsseldorf, 17 January 2019

To whom it may concern

Idemitsu Polycarbonate TARFLON is – if not otherwise explicitly stated – in general free of halogens as far as IEC 61249-2-21 is concerned. This means, that the total content of halogens resulting from halogen containing components, including additives, processing aids and residual solvent shall not exceed 0.15 % by weight.

All hereunder mentioned products are free of PCB (polychlorinated biphenyls) and PCT (polychlorinated triphenyls).

This statement is valid for the ignition resistant products TARFLON IRY2200, IVY2200R, AZ1900, AZ1900T, IBY2500, GZ2510, GZ2520, GZ2530.

Above further applies to the polycarbonate TARFLON standard products IR1700, IR1900, IR2200, IR2500, IV1900R, IV2200R, IV2500R.

Mentioned product types do not contain silicon components.

Idemitsu Chemicals Europe GmbH.
