EG (EC) 1272/2008 – CLP 1.3.4 Metals in massive form, alloys, mixtures containing polymers, mixtures containing elastomers  
1.3.4.1 Metals in massive form, alloys, mixtures containing polymers and mixtures containing elastomers do not require a label according to this Annex, if they do not present a hazard to human health by inhalation, ingestion or contact with skin or to the aquatic environment in the form in which they are placed on the market, although classified as hazardous in accordance with the criteria of this Annex.

In the masterbatch, the hazardous substance is surrounded by the polymer, preventing a direct contact with the hazardous substance. For such mixtures, a labelling is not necessary. However, all data, that otherwise should be mentioned on the label, have to be stated in form of this safety data sheet.

A release of the hazardous substance from the mixture through migration to the surface or through abrasion is possible. In this case, the safety regulations described in this safety data sheet apply. Observe the general safety regulations when handling chemicals.
