ESTANE® GP 52DT NAT 055 FOOD CONTACT CLEARANCE

COMMISSION REGULATIONS (EU): NO. 10/2011, NO. 1935/2004, and NO. 2023/2006. (AS AMENDED)

ESTANE® GP 52DT NAT 055 is composed of ingredients which meet the current requirements of Commission Regulation (EU) No, 10/2011¹. All the monomers and additives are listed. Some substances have restrictions and/or specifications. A nondisclosure agreement is required to provide compositional information.

This product is manufactured at a site that conforms to Management System Standard ISO 9001 or other quality assurance procedures. These standards require a quality approach to manufacturing and require the manufacturer to best implement the necessary controls consistent with the intent of GMP regulations. It complies with the safety requirements of the EU Framework Regulation (EC) No. 1935/2004 and Regulation (EC) No. 2023/2006. The manufacturer of the final food contact article must meet the requirements of 1935/2004 particularly the determination of suitability for the application and the verification that the article does not affect smell or taste of the food or cause any substance to migrate at levels that exceed any limitation.

¹ The overall migration limit of 10mg/dm² contact surface or 60 mg/kg food and the specific migration limits for the below mentioned products must be met by the final article coming into contact with foodstuffs.

U.S. FDA CLEARANCE

ESTANE® GP 52DT NAT 055 is composed of ingredients which meet the current requirements of the FDA for food contact applications when used in accordance with the requirements and limitations of 21 CFR: 175.105, 177.2600^{1,2}.

¹ For use as a release agent.

² May be used in conveyor belts in contact with all food types at room temperature or below, at levels not to exceed 0.5 wt% of the finished rubber product.
