**Re: Presence of SVHCs in Lubrizol products**

Dear Valued Customer:

Thank you for your enquiry regarding the potential presence of substances of very high concern (SVHC) in products marketed by Lubrizol. The current Candidate List of SVHCs and additional information regarding potential obligations associated with SVHCs can be found on the ECHA web site:

<https://echa.europa.eu/candidate-list-table>

Although we do not routinely analyse purchased raw materials or products we manufacture for substances listed on the current Candidate List of SVHCs, revised November 2024, none of these substances are expected to be present in Lubrizol products at 0.1 wt% or greater, either intentionally or as an impurity, based on information received from our suppliers and knowledge of our manufacturing processes. We are therefore pleased to confirm that to the best of our knowledge the following products supplied to you by Lubrizol do not contain 0.1 wt% or greater of any substance(s) included on the current Candidate List of SVHCs.

PEARLTHANE™ 11T85  
PEARLTHANE™ 11T95P

Presence of potential SVHC components is also outlined in our EU Safety Datasheets in section 15.

If you need any further information please do not hesitate to contact us.
