

Substance Declaration

Products **BEETLE PA6 GF15 IM BLK**

Polyram UK offers the following relating to the above listed product(s):

We hereby confirm that during manufacture of the above listed product(s), all of the component raw materials are listed as active / existing on the **TSCA** Inventory of May 2024 and that none of those component materials are listed with EPA regulatory flags.

PROPOSITION 65 - The chemical substances listed in the current version of California Proposition 65, as on January 3rd 2025 - Polyram UK Ltd (PRUK) can provide the following confirmations in respect to its above listed product(s):

- The various restricted chemical substances referred to in the list are not intentionally introduced into these products as formulation ingredients, or:
- If a substance is used it is present only in a form that is different to the physical form in which it appears in the substances list (for example, Carbon Black is used in some of the product(s) but not in an unbound form. It is instead present in an encapsulated form, bound within the finished polymer matrix).
- They are not otherwise known to be present consequentially from our manufacturing processes.

The possibility of trace levels of some listed substances being present as impurities in component raw materials supplied to us by third parties cannot be excluded, but following our technical evaluation of the raw materials used in these compounds, they are not expected to be present above the threshold limit of 0.1% (w/w). Please note however that Polyram UK Ltd does not analyse its incoming raw materials or finished products for the chemicals and substances detailed in this document.

This information is provided in good faith and is based on the supporting data provided by our raw material suppliers. It is based on our understanding of the relevant laws and regulations as they stand currently and applies only to the listed compounds as manufactured and sold by Polyram UK Ltd as finished products.
