

## Substances Declaration

<b>Products</b>	<b>PLUSTEK PB142NT-UK</b>
-----------------	---------------------------

With regards to PROPOSITION 65 - the chemical substances listed in the current version of California Proposition 65, as on August 11th 2023 - Polyram UK Ltd (PRUK) can provide the following confirmations in respect to its above listed grade(s):

- The various restricted chemical substances referred to in the list are not intentionally introduced into these products as formulation ingredients, or:
- If a substance is used it is present only in a form that is different to the physical form in which it appears in the substances list (for example, Carbon Black is used but not in an unbound form. It is instead present in an encapsulated form, bound within the finished polymer matrix).
- They are not otherwise known to be present consequentially from our manufacturing processes.
- Residual levels of some listed substances may be present as impurities in component raw materials supplied to us by third parties but following our technical evaluation of the raw materials used in these compounds, none are expected to be present above trace amounts. (Please note however that PRUK does not analyse its incoming raw materials or finished products for the chemicals and substances covered by this document).

This information is provided in good faith and is based on the supporting data provided by our raw material suppliers. It is based on our understanding of the relevant laws and regulations as they stand currently and applies only to the listed compounds as manufactured and sold by Polyram UK Ltd as finished products.
