Rev.1/PF/08,08,2024

RoHS – Directive 2011/65 EU and 2015/863 EU

Based on the information available to us from our suppliers and the regulations applicable within the EU, we make the following statement for our products (mixtures).

During the manufacture of the recyclable materials supplied to us (the basis of our products), none of the substances listed in the RoHS Directive are intentionally added or produced.

- lead
- quicksilver
- cadmium
- hexavalent Chrom
- polybrominated biphenyls(PBB)
- polybrominated diphenylether (PBDE)
- bis(2-ethylhexyl)-phthalat (DEHP)
- butylbenzyl-phthalat (BBP)
- bibutyl-phthalat (DBP)
- disobutyl-phthalat (DIBP)

No additional testing is carried out in-house. The requirements of Directive 2011/65 EU supplemented by 2015/863 EU are fulfilled.

The information reflects the results of the documentation. A guarantee of specific properties for specific uses cannot be derived.

In order to verify the RoHS conformity of our products, we have spot checks carried out by certified service providers at regular intervals. We have had the effectiveness of this system confirmed by a well-known consulting company. We are therefore entitled to issue this confirmation for our products as described. However, we recommend additional tests to determine suitability. The warranty is provided in accordance with our general terms and conditions of sale and delivery.

According to our knowledge, these substances cannot be contained in our products. If you have any questions about this, please contact Mr. Patrick Fritsche or your known contact person in our company.

Best Regards
RSH POLYMERE GmbH
