**Subject: Absence of dangerous and prohibited substances – Declaration:**

- Absence of Materials of Animal Origin, Bovine Spongiform Encephalopathy and Transmissible Spongiform Encephalopathy;
- Absence of Genetically Modified Organism (GMO).-

Dear Customer,

Based on the recipes of materials and preparations, produced and supplied by RADICIGROUP PERFORMANCE PLASTICS, and identified under the trade names:

**RADILON<sup>®</sup>, RADIFLAM<sup>®</sup>, RADILENE<sup>®</sup>, RADITER<sup>®</sup>, RADISTRONG<sup>®</sup>,  
HERAMID<sup>®</sup>, HERAFORM<sup>®</sup>, HERAFLEX<sup>®</sup>, TORZEN<sup>®</sup>, RADITECK<sup>®</sup>**

We declare that the raw materials regularly used in the manufacture of the above mentioned materials/preparations are mainly of petrochemical origin and not from animal sources, like cattle, sheep, goat or other animals.

Furthermore in the same manufacturing processes are not used any substances that, for their own nature, could have been genetically modified (GMO).

Where certain substances of an animal origin are used (like for instance, Stearate derivatives), during the typical production processes (polymerization, compounding and/or next every transformation processes – e.g. injection molding, extrusion, etc.) they are treated at high temperatures and undergo chemical reactions, which exceed by far the stringent requirements laid down in order to prevent the actions of every agents transmitting the Bovine Spongiform Encephalopathy (BSE) and the Transmissible Spongiform Encephalopathy (TSE) diseases.

Furthermore, if at the end of some of the above mentioned standard processes, carried out at temperature above 200°C, there were still active prions, they would be embedded in a plastics matrix and then not bio-available.

Therefore, for the above listed reasons, transmission of BSE and TSE by the mentioned materials/preparations is not expected to occur.
