

# RADILON BN 200 AS 2 natural

## DESCRIPTION

PA6

This material is suitable for housing, fans, fasteners, clips, cable ties

ISO 1043: PA6

REGIONAL AVAILABILITY: Europe

## MATERIAL HANDLING AND PROCESSING

The material is delivered in moisture-proof packaging ready for processing. Maximum recommended water content for best processing is 0.15%. Typical conditions with a desiccant drier: temperature 80 ° C, dew point -20 ° C or below, time 2-4 h or more. Special care must be taken to avoid moisture absorption and contamination with other polymers when adding regrind material. Colour variation and mechanical properties reduction may occur and should always be carefully monitored.

### Injection Molding Processing Parameters

Melt Temperature  
250 - 270°C

Mold Temperature  
60 - 80°C

Injection Speed  
high

## PRODUCT SAFETY AND APPROVALS

For safety instruction please refer to Material Safety Data Sheet  
ROHS compliant 2011/65/EU and following amendments

## TECHNICAL DATA SHEET

# RADILON BN 200 AS 2 natural
