TRADEMARK DECLARATION

On 1 JUNE 2007, REACH directive No. 1907/2006 created by the European Union regarding chemical materials was entered into force.

As Tisan, our obligations related to the REACH regulation and its applications have been evaluated and related studies were conducted by our management. As explained in REACH Directive, the mixtures that we produce are evaluated as compounds. Registration is not a requirement for compounds. However, the producers of compounds are obliged to track the registration process of the additives and monomers which they use in their compounds.

In this process, our firm follows the registration process of the products indirectly. Due to REACH Standard, we are in contact with our suppliers in respect of all materials that we use for the production of our products.

We check and interrogate whether or not the registration of the chemicals that we acquired are conducted accurately through the announcements of European Chemicals Agency (ECHA) and we request the documents if registration is done.

As the documents include commercial information, our firm is not legally obliged to disclose the registration number obtained from the suppliers or CAS and EC numbers.

ECHA announced SVCH Candidate List on 28 October 2008. The list will be included in Annex XIV of REACH Regulation. The agency would announce the first Annex XIV List on 1 June 2009 and update the list yearly. The updated list as of 15 JANUARY 2018 is presented attached.

We hereby confirm, that the products and materials that we acquire for our firm do not comprise any elements that are included in the below table, and that any materials that are not in compliance with REACH Regulation and with 2011/95/EU RoHS 2 Directive are not used in our products.
